

# Wunder Mobility

Headquartered in Germany with teams in Europe, Asia, and the U.S. we are the leading tech platform for new mobility operators. We provide turn-key solutions that enable companies and cities worldwide to provide clean, convenient, and accessible mobility. Cities and companies use the Wunder Mobility platform to launch and scale new mobility services, manage and finance fleets of shared vehicles, optimize daily operations and improve urban planning and traffic management.

Our technology is used by 75+ clients from across the world, including leading OEMs, VC-backed start-ups, energy utility companies, and progressive cities. The global Wunder Mobility team of 150+ professionals covers over 40 nationalities and includes veterans from the tech and automotive industry. Over 50% of the team is in Product & Engineering. Wunder Mobility was founded by Gunnar Froh and Samuel Baker in 2014.

## Vision

Our mission is to accelerate the global transition to sustainable transport by helping our clients to launch and scale new mobility solutions in an independent and values-driven company that attracts and retains exceptional people. We create technology that helps to improve the quality of life in cities with travel options that are safe, affordable, and sustainable.

Our technology is deployed in more than 900 cities on 6 continents, connecting over 50 thousand sharing vehicles. We have facilitated over 22 million trips worldwide.
